

## Connect to MySQL from (.NET Framework) in Visual Studio

Dependencies: [MySQL Connector/NET](#), [MySQL for Visual Studio](#)

1. Open **Visual Studio**
2. Click **Create a new project**
3. Right click on project and select **Manage NuGet Packages**

4. Click **Browse**
5. Search for **MySQL**
6. Install **MySql.Data.EntityFramework v8.0.19**

**\* It's important that the NuGet package has same version number as the MySQL Connector**
